

Project Demo Planning

Date	15 March 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction Using Machine Learning
Maximum Marks	1 Mark

Project Demo Planning:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce the project, explain the problem statement, objectives, scope, and the motivation behind developing the Credit Card Approval Prediction System.	3	Patnam Lakshmi (Team Leader)
2	Dataset & Machine Learning Model	Explain the dataset, data preprocessing, feature selection, model training, and evaluation metrics such as Accuracy, Confusion Matrix, and Classification Report.	5	Ameer Babu Kadapa & Arsheen Khanam
3	Live Application Demonstration	Demonstrate the Flask web application, show how applicant details are entered, and perform a live prediction.	5	Venkatasai Meruva
4	System Architecture & Technology Stack	Present the solution architecture, data flow, technology stack, and overall workflow of the application.	3	Shahul Raj shaik
5	Testing & Results	Explain functional testing, performance testing, code quality, GitHub repository, and summarize the project outcomes.	3	Arsheen Khanam
6	Conclusion & Question–Answer Session	Summarize the project, discuss future enhancements, and answer questions from the evaluators.	4	Whole Team

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce the team and project, explain the problem of manual credit card approval, project objectives, scope, and expected benefits.
2	Solution Overview	Present the proposed solution, technology stack, solution architecture, dataset, machine learning workflow, and model evaluation results (Accuracy, Confusion Matrix, and Classification Report).
3	Live Feature Demonstration	Demonstrate the Flask web application by entering applicant details, validating inputs, generating a live credit card approval prediction, and showcasing the dashboard and key functionalities.
4	Q&A Session	Summarize the project, discuss future enhancements, answer evaluators' questions, and explain design decisions, model selection, and implementation details.
