

Demonstration of Proposed Features

Date	15 March 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction Using Machine Learning
Maximum Marks	1 Mark

Demonstration of Proposed Features:

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User-Friendly Web Interface	Provides a responsive and intuitive interface for entering applicant details and viewing prediction results.	Implemented	Yes	Successfully demonstrated with live user input.
2	Applicant Data Validation	Validates user inputs before processing to ensure complete and valid information is submitted.	Implemented	Yes	Prevented invalid or incomplete data during demonstration.
3	Credit Card Approval Prediction	Predicts whether a credit card application is approved or rejected using the trained machine learning model.	Implemented	Yes	Live prediction successfully demonstrated.
4	Model Performance Evaluation	Displays evaluation metrics such as Accuracy, Confusion Matrix, and Classification Report.	Implemented	Yes	Model performance results were presented and explained.
5	Interactive Dashboard	Displays project information, prediction functionality, and navigation through a responsive dashboard.	Implemented	Yes	Dashboard navigation and features were demonstrated successfully.

6	Project Deployment & Version Control	Project source code maintained on GitHub and application deployed for demonstration (if applicable).	Implemented	Yes	GitHub repository and deployed application (if available) were presented.
---	--------------------------------------	--	-------------	-----	---

Feature Implementation Summary:

Feature Implementation Summary	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
