Project Name	Credit Card Approval Prediction Using Machine Learning
Maximum Marks	2 Marks

Data Flow Diagram

The **Data Flow Diagram (DFD)** illustrates how data moves through the **Credit Card Approval Prediction System**. It begins with the applicant submitting the application form and required documents. The system receives and stores the applicant's information, preprocesses the data, and sends it to the machine learning prediction model. Based on the prediction results, the system generates the final approval or rejection decision and communicates the outcome to the applicant. This process ensures faster, more accurate, and efficient credit card approval decisions..

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	Applicant (Credit Card Applicant)
Rectangle with numbered header	Process	1.0 Receive Application 2.0 Data Preprocessing 3.0 ML Prediction Model 4.0 Generate Decision
Rectangle (solid fill, no number)	Data Store	Applicant Database Trained ML Model
Labeled arrow	Data Flow	Application Form & Documents Applicant Details Stored Applicant Data Cleaned Data Model Request Model Response Prediction Result Approval/Rejection Notification

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
