

Credit Card Approval Prediction System - ER Diagram Description

The Entity Relationship (ER) Diagram represents the core database structure of the Credit Card Approval Prediction System.

Entities:

Users, Applicant_Details, Credit_History, ML_Model, Approval_Prediction.

Primary Keys:

Users(UserID), Applicant_Details(ApplicantID), Credit_History(HistoryID), ML_Model(ModelID), Approval_Prediction(PredictionID).

Relationships:

- Users 1:M Applicant_Details
- Applicant_Details 1:M Credit_History
- Applicant_Details 1:1 Approval_Prediction
- ML_Model 1:M Approval_Prediction
- Credit_History 1:M Approval_Prediction

Applicant_Details Attributes:

ApplicantID (PK), UserID (FK), IncomeType, EducationType, FamilyStatus, HousingType, EmploymentDays, AnnualIncome, Occupation, Age, Gender.

Credit_History Attributes:

HistoryID (PK), ApplicantID (FK), CreditScore, ExistingLoans, PaymentStatus, OverdueAmount, CreditLimit.

ML_Model Attributes:

ModelID (PK), ModelName, Algorithm, Accuracy, Version, TrainingDate.

Approval_Prediction Attributes:

PredictionID (PK), ApplicantID (FK), HistoryID (FK), ModelID (FK), PredictionResult, ProbabilityScore, PredictionDate.
